

Datagraphication

Xavier, Bryan and Maruthi, Field Engineers Neo4j

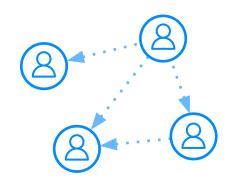

Everything is Connected and Graphs are Everywhere

Graph technology unifies data relationships in a more intuitive, connected state, unlocking deeper context

Shifting from data-driven to intelligence-driven

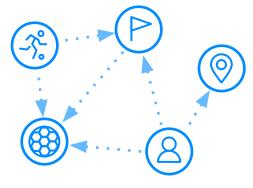

People

E.g., Employees, Customers, Suppliers, Partners, Influencers

Transactions

E.g., Purchases, Payments, Bookings, eCommerce

Knowledge

E.g. Enterprise / Domain content, Risk Management, Supply Chain

Neo4j, the graph company

Creator of the **Property Graph** and **Cypher** language at the core of the **GQL** ISO project

Thousands of Customers World-Wide

HQ in Silicon Valley, offices include London, Munich, Singapore, Paris & Malmo

Neo4j, use cases

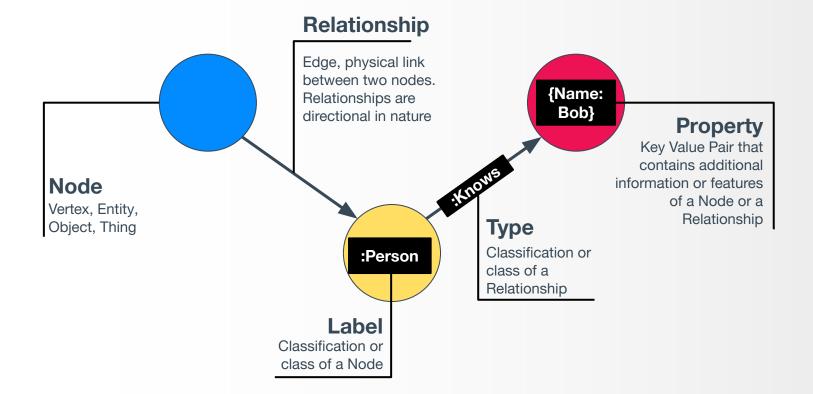

Graphs

"It's not a technology, it's a mindset"

Building blocks of Labelled Property Graph (LPG)

How to speak Graph: Cypher

```
Example:
(:Person {name: 'Ann'}) -[:OWNS]-> (:Car {brand: 'Volvo'})
```

Workshop

Load differents dataset to find more and more insights

Step 1 - Setup your own graph database

- 1. Go to https://bit.ly/free-graph-db
- 2. Create an account
 - 2.1. Put your email and a password
- 3. Click on the **link** of the verification email just received
- 4. Click on **Dashboard** once verified
- 5. Agree on the Term Policy
- 6. Select
 - 6.1. AuraDB Free
 - 6.2. Change the name but you can keep Instance01
 - 6.3. Keep the region as Singapore
 - 6.4. Click on **Empty database** option
 - 6.5. Click on **Create Instance**
- 7. You will get the password of your instance: make sure you save it somewhere (notepad, file, email...). Tick the checkbox and click on continue
- 8. "Et voila!" your instance is ready to be used in a few minutes!

Step 2

Load your first dataset

https://bit.ly/graph-step2

Step 3

Load another dataset

https://bit.ly/graph-step3

Step 4

Let's add a last dataset

https://bit.ly/graph-step4

Final step

Link everything for new insights

https://bit.ly/graph-final_step

Takeaways

- You started your journey into Graphs
- You have an up and running Graph database
- You know the language used for Graphs
- You can load a csv file and runs some queries

What's next is up to you...

Nodes 2022

THANK YOU

Brought to you by
Government Technology Agency

Engaging like-minded through STACK

GovTech's developer community

Join us @ go.gov.sg/stackxtelegram

We are looking for passionate individuals to join us as STACK advocates

Benefits

Be one of the first to provide feedback to help improve our products

Meet developers behind the products

Engage senior government leaders

Register your interest at go.gov.sg/stackadvocatereg

Your feedback matters!

Upon completion, show the survey's thank you page to the STACK team stationed outside of the workshop rooms to collect your swag!

https://go.gov.sg/stack2022-workshop-feedback
